“Setting the Standard... for Excellence”

Jeron Nurse Call Executive Summary

Standard Communications, Inc. (SCI) is known as the leader for providing the fastest growing nurse call and next gen HTM technology solutions to help modernize VA facilities. As the market leader in nurse call technology, we exclusively serve the VHA and provide the required VA knowledge to successfully deploy in record time. The following are the top reasons why the VA is selecting **SCI** and **Jeron** nurse call.

Customers are adopting Jeron's top-rated nurse call and code blue system because it addresses **TODAY'S** acute care needs; leading to its rapid adoption across the VA and Nationally within the last 18-months

Healthcare Leaders are being convinced to go with Jeron because of its quality, low cost, best-in-class total cost of ownership, staff safety features and the product is **100% local/domestic supplied direct** from Chicago providing the **highest-rated speed-of-deployment** with customization. – **never had nor will they have supply chain issues**

HTM BMET and BMES employees are most attracted to Jeron's **dependability, speed of deployment, cost, serviceability, endless-free training, PIV badged remote support engineers** and **highest uptime producing 90% fewer service trouble tickets - Less downtime and impact downstream with room service - doesn't affect any other rooms**

Patients and Care team users are enjoying Jeron's ease of use, **customization, staff safety, clinical workflow efficiency gains, multi-acuity platform, and dependability** (up time). Patients find that Jeron's systems positively affects their care experience by providing faster response times, a quieter, and safer environment

Deployment delays are eliminated with **100% of the local/domestic supplied direct** from Chicago providing the **highest-rated speed-of-deployment** with customization. – **never had nor will they have supply chain issues**
